(408) 656-5180 | evl2121@columbia.edu | linkedin.com/in/elizabethvlu | github.com/LuluLizzy8

EDUCATION

Columbia University, School of Engineering and Applied Science

M.S. in Computer Science, GPA 3.71

New York, NY

Expected May 2027

Coursework: Machine Learning, Deep Learning for Computer Vision, Spoken Language Processing, Databases

New York University, College of Arts and Science

B.A. in Computer Science & Economics, Minor in Physics & Math, GPA 3.647

New York, NY

Dec 2024

Coursework: Algorithms, Artificial Intelligence, Data Structures, NLP, OOP, Software Engineering, Statistics

INDUSTRY EXPERIENCE

Amazon

SDE Intern

Sept 2026 – Nov 2026

New York, New York

Federal Reserve of Philadelphia

SRC Generative AI Intern

May 2026 – Jul 2026

Philadelphia, PA

- Scoped and built a pilot AI research-paper replicator that extracted methodologies, identified datasets, prepared data, validated summary statistics, and supported regression replication.
- Integrated the FRED API and PostgreSQL-based access to authorized internal RADAR datasets, enabling automated data retrieval within a closed, internet-restricted environment.
- Interviewed 4 economists to shape a human-in-the-loop workflow, reducing replication time from weeks to 20 min.

Corigine Inc.

Tech Intern

Jan 2022 – Aug 2023

Santa Clara, CA (Remote)

- Identified a bottleneck in a system-validation regression workflow and implemented a hash-table-based comparison approach, reducing data-comparison time by 20%.
- Collaborated with engineering and business teams to launch a company webpage and support cross-regional technical communications.

PROJECTS & RESEARCH EXPERIENCE

Tripable - Collaborative Group Travel Planner | React, Node.js, Supabase, Vercel, Codex

Spring 2026

- Conceived and validated a group-travel planning product through user interviews, pain-point analysis, feature prioritization, and user acceptance testing.
- Built and deployed a full-stack MVP supporting trip creation, participant invitations, shared ideas, voting, and itinerary generation; used Codex and GitHub Copilot to accelerate implementation and debugging.

Outfit Compatibility Modeling | Python, PyTorch, YOLOv8-Seg, ResNet-18, OpenCV

Fall 2025

- Redesigned a garment-compatibility task after diagnosing poor real-world generalization from standardized product images; constructed a new pairwise dataset from real outfit images.
- Trained ResNet-18 compatibility model and integrated it with a garment-detection pipeline for outfit analysis.

Legal LLM Evaluation on CaseHOLD | Python, PyTorch, Hugging Face Transformers, Ollama, RegEx

Fall 2024

- Built a reproducible benchmarking pipeline for Llama, Phi-3, Gemma 2, and Mistral, including local inference, output normalization, and cross-model evaluation.
- Contributed to a Weighted Correctness Score incorporating question difficulty, confidence, and correctness to supplement conventional metrics.

Video Sharing Platform | Java, TypeScript, Angular, Spring Boot, Node.js, Agile

Spring 2024

- Led a four-person team in designing a full-stack platform with authentication, video upload/playback, backend APIs, and database-backed functionality.
- Developed Java/Spring Boot services, defined system architecture, coordinated API integration, and resolved frontend-backend integration issues.

SKILLS

Languages: Python, Java, C/C++, SQL, JavaScript/TypeScript, HTML/CSS

AI/ML & Data: PyTorch, Hugging Face Transformers, scikit-learn, pandas, NumPy, OpenCV, Ollama

Systems, Web & Cloud: PostgreSQL, MongoDB, Supabase, React, Node.js, Express, Spring Boot, AWS S3, Vercel

Developer Tools: Git/GitHub, Linux/Unix, Postman, Jupyter, Claude Code, OpenAI Codex
